1. Executive Summary

RAVE Works is a social-first creative marketplace connecting **Rave Heads** (creators, freelancers, editors, musicians, models, sales agents) with **OG Vendors** (brands, agencies, labels). The platform blends a social feed with a professional work/campaign engine — think LinkedIn × Instagram for the creator economy.

ROLE	DESCRIPTION
Rave Head	Creative talent — posts work, applies to campaigns, delivers projects
OG Vendor	Brand or agency — posts campaigns, reviews applicants, hires creators
Admin	Platform operator — verifies identities, moderates content

2. System Architecture Overview

```
[ Auth Layer ] ──► [ Feed (Social) ] ──► [ Campaign / Work System ] ──► [ Project
Workspace ]
                                                  ▲                              ▲
                                            [ Explore ]                    [ Inbox /
Chat ]
                                            [ Profile ]                    [ Payments
]
                                            [ Admin Console ]
```

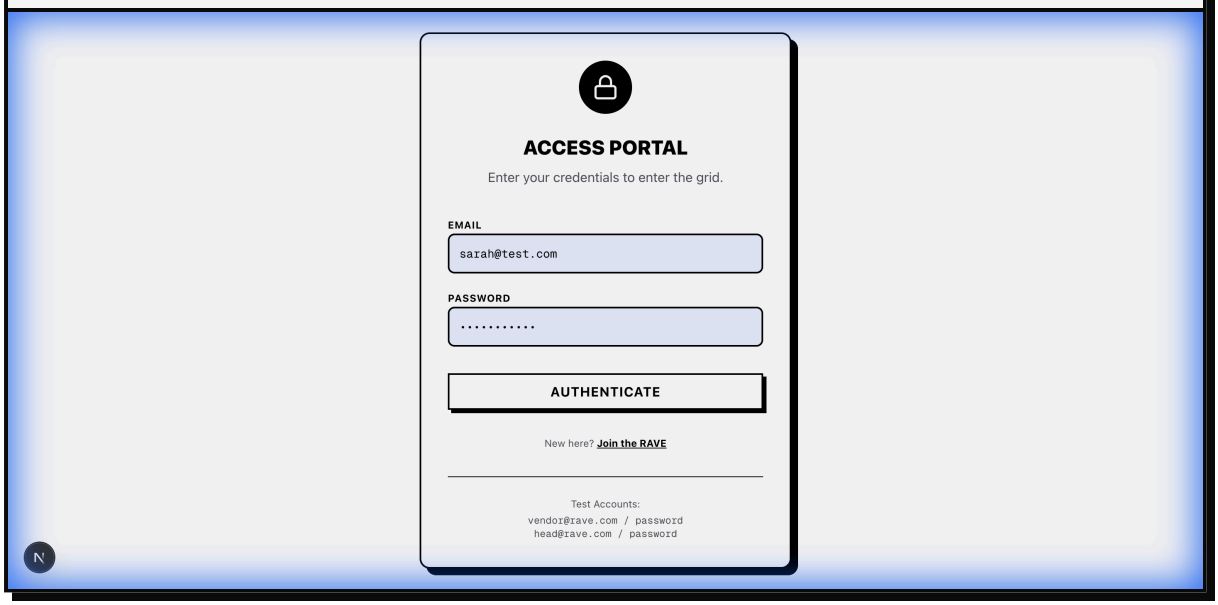
STACK LAYER	TECHNOLOGY
Frontend	Next.js 15 (App Router)
Database	MongoDB + Mongoose ODM
Authentication	JWT stored in React AuthContext
Styling	Tailwind CSS
Design Language	Neobrutalism — thick borders, tactile buttons, bold uppercase typography, black/white palette

3. Screen-by-Screen Design & Workflow

01 Login Page

/login · Public Access

● LIVE SCREENSHOT — ACCESS PORTAL



LAYOUT

Full-screen centered card (max-w-md). Lock icon logo lockup. H1: "Access Portal" (bold uppercase). Subtext: "Enter your credentials to enter the grid."

UI ELEMENTS

ELEMENT	DETAILS
Email Input	`type="email"`, placeholder: `user@rave.com`
Password Input	`type="password"`, placeholder: `••••••••`
Submit Button	Tactile neobrutalist button — label: "AUTHENTICATE"
Error Banner	Red-bordered box, renders API error messages inline
Signup Link	"New here? Join the RAVE" → `/signup`
Dev Hint	Shows test account credentials at bottom (dev environment only)

AUTHENTICATION WORKFLOW

```
User enters email + password
         │
         ▼
POST /api/auth/login
         │
     ┌───┴───┐
  Success   Failure
     │          │
     ▼          ▼
JWT stored   Error banner
in context   displayed
     │
     ▼
Redirect to / (Feed)
```

BUSINESS RULES

- On success: JWT stored in `AuthContext`, user redirected to `/` (feed)
- On failure: Error displayed inline, no page redirect
- If already authenticated: Middleware redirects away from login page

02 Signup — Role Selection

/signup (Step 1) · Public Access

● LIVE SCREENSHOT — CHOOSE YOUR PATH (ROLE SELECTION)

UI ELEMENTS

ELEMENT	DETAILS
Rave Head Card	Sparkles icon — "Creatives, Freelancers, Editors, Musicians, Models"
OG Vendor Card	Briefcase icon — "Brands, Agencies, Labels"
Continue Button	Active role card highlighted with dark border; "CONTINUE" proceeds to step 2
Login Link	"Already have an account? Login" → `/login`

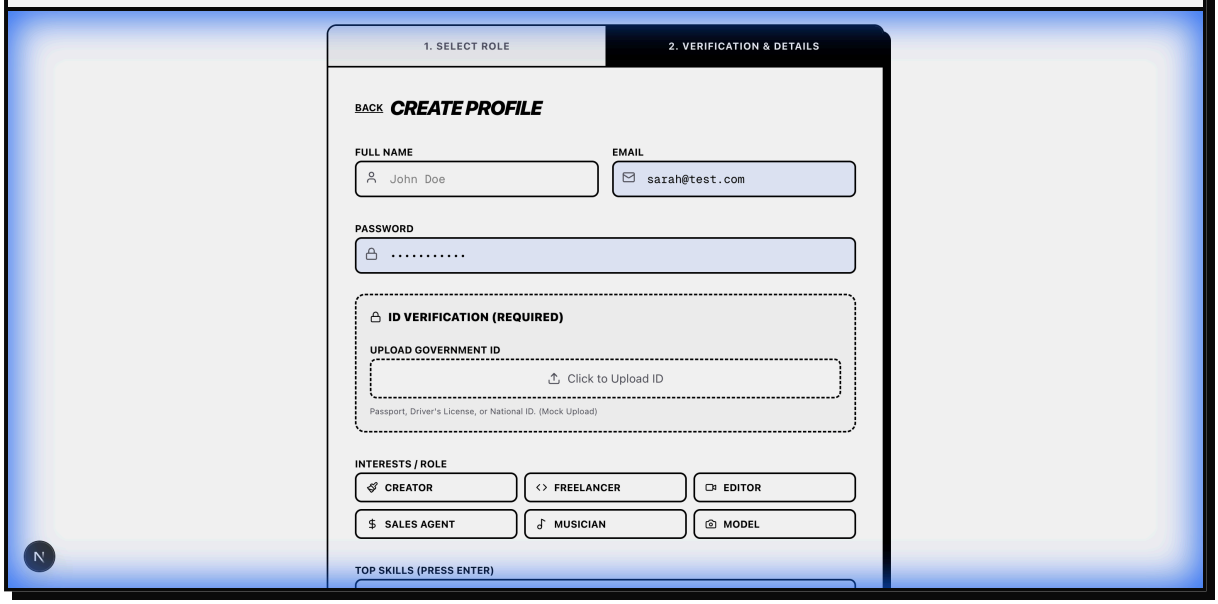
STEP 1 WORKFLOW

```
User lands on /signup
       |
       ▼
Select role: RAVE HEAD or OG VENDOR (default: Rave Head)
       |
       ▼
Click CONTINUE → Step 2 form renders
```

03 Signup — Details & Verification

/signup (Step 2) · Public Access

● LIVE SCREENSHOT — RAVE HEAD REGISTRATION FORM



UI ELEMENTS — RAVE HEAD PATH

ELEMENT	DETAILS
Full Name	Text input — Required
Email	Email input — Required
Password	Password input — Required
ID Verification	File upload (Government ID, image or PDF) — **Mandatory**
Interests	Toggle chip grid: Creator, Freelancer, Editor, Sales Agent, Musician, Model
Skills	Tag input — press Enter to add, × to remove
Submit	"COMPLETE REGISTRATION" tactile button

UI ELEMENTS — OG VENDOR PATH

ELEMENT	DETAILS
Full Name, Email, Password	Standard required inputs
ID Verification	File upload — **Mandatory**

Vendor Type	Radio selector: Individual vs. Company
Brand Name	Text input
Description	Textarea — "What does your brand do?"
Company Doc	File upload (company registration doc) — shown when Company type selected

SIGNUP WORKFLOW

```
Fill form + Upload ID document
         │
         ▼
POST /api/auth/signup
         │
    ┌────┴────┐
  Success   Failure
    │           │
    ▼           ▼
JWT issued   Alert shown,
Redirect to  user stays
/dashboard   on page
         │
         ▼
verificationStatus = "pending"
Content creation is LOCKED until admin approval
```

BUSINESS RULES

- ID Document upload is **mandatory** for all roles
- Company vendors must additionally upload a company registration document
- Account is created with `verificationStatus: "pending"`
- JWT is issued immediately so user can view dashboard and track verification status

04 Feed — Home

/ (feed route group) · Authenticated

● LIVE SCREENSHOT — SOCIAL FEED STREAM

POST TYPES IN FEED

TYPE	DESCRIPTION	AUTHOR
DROP	General creative content post (text + optional media)	Rave Head
WORK	Portfolio work showcase with tags and category label	Rave Head
CAMPAIGN	Job/gig posting with requirements, budget, and Apply CTA	OG Vendor

FEEDPOST CARD ANATOMY

- Author avatar, display name, role badge, relative timestamp
- Content: title (optional), text body, media image or video
- Campaign card: requirements list, budget label, "APPLY" button
- Work card: tag chips, creative category
- Metrics: Likes ("Praise") count, Comments count
- Actions: Like, Comment, Share

FEED WORKFLOW

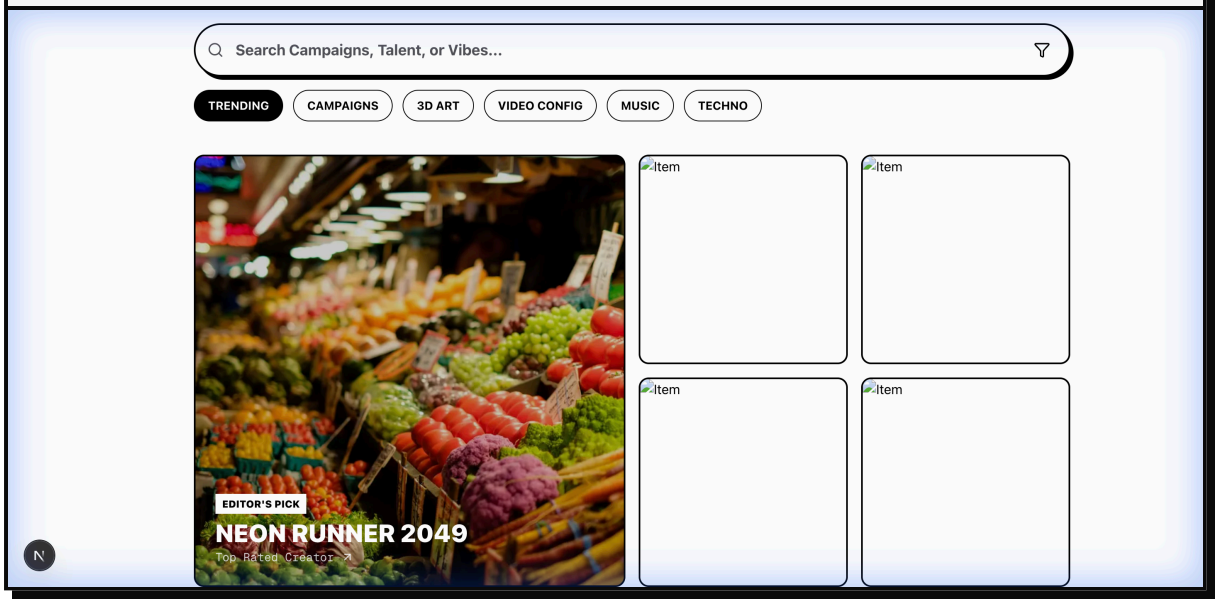
```
User opens app → GET /api/feed
        |
        ▼
Render FeedPost cards (chronological)
        |
```

```
      ┌──────┴──────────────────────┐
      │                             │
    CAMPAIGN card             DROP / WORK card
      │                             │
      ▼                             ▼
    "APPLY" CTA              Like / Comment actions
      │
      ▼
    POST /api/application
```

05 Explore

/explore · Authenticated

● LIVE SCREENSHOT — DISCOVERY GRID WITH EDITOR'S PICK FEATURE



UI ELEMENTS

ELEMENT	DETAILS
Search Bar	Rounded-pill input — "Search Campaigns, Talent, or Vibes..."
Filter Button	Opens advanced filter panel
Category Pills	Scrollable: Trending, Campaigns, 3D Art, Video Config, Music, Techno
Editor's Pick	Large 2×2 featured card with "EDITOR'S PICK" badge overlay
Grid Cards	Aspect-square image cards with hover "View" overlay

BUSINESS RULES

- Search queries across talent profiles (Rave Heads) and campaigns (OG Vendors)
- Filter categories map to post types and creative categories
- "Editor's Pick" is manually curated by Admin via the Admin Console

06 Create Post / Campaign

/create/post & /create/campaign · Authenticated + Verified

Access Gate: Only users with `verificationStatus === "verified"` can access this screen. Unverified users see a locked state prompting them to await admin approval.

UI ELEMENTS — CREATE POST (RAVE HEAD)

ELEMENT	DETAILS
Type Selector	Toggle: DROP / WORK
Title	Optional text input
Body	Textarea — main content (required)
Media Upload	Image or video file
Tags	Tag input — Enter to add (WORK type only)
Category	Dropdown (WORK type only)
Submit	"POST TO THE GRID"

UI ELEMENTS — CREATE CAMPAIGN (OG VENDOR ONLY)

ELEMENT	DETAILS
Campaign Title	Text input — Required
Campaign Type	Enum: CREATOR / SALES / FREELANCE
Description	Textarea — Required
Requirements	Dynamic list — add/remove items individually
Pay Amount	Text input (e.g., "₹5000 per reel")
Asset Upload	Brand assets zip or individual files for creators to download
Submit	"LAUNCH CAMPAIGN"

07 Dashboard

/dashboard · Authenticated

Role-Adaptive: Dashboard renders a different layout for Rave Heads ("Gig Center") vs. OG Vendors ("Campaign Manager").

7A — RAVE HEAD DASHBOARD ("GIG CENTER")

SECTION	DETAILS
Active Applications	List of campaigns applied to, each with status badge (PENDING / ACCEPTED / REJECTED)
Inbox Preview	Latest 3 messages from vendors — sender avatar, name, snippet, date
Empty State CTA	"FIND GIGS" → links to feed

7B — OG VENDOR DASHBOARD ("CAMPAIGN MANAGER")

SECTION	DETAILS
Campaign Cards	Each card: title, status (active/closed), total applicant count
Recent Applicants	Avatar, name, "VIEW STAT" and "HIRE" action buttons
View All Button	Dashed-border button per campaign → application detail list

HIRE FLOW

```
Vendor clicks HIRE on applicant card
        |
        ▼
Confirm: "Hire this creator?"
        |
        ▼
POST /api/project/init { applicationId }
        |
        ▼
Project record created (status: ACTIVE)
        |
        ▼
Redirect to /project/[id]
```

08 Project Workspace

/project/[id] · Vendor + Assigned Creator Only

PROJECT STATE MACHINE

```
ACTIVE → SUBMITTED → REVISION → COMPLETED
```

PAYMENT STATE MACHINE

```
PENDING → HELD → RELEASED
```

UI SECTIONS

SECTION	DETAILS
Briefs & Assets	Campaign description + downloadable brand assets uploaded by vendor
Submission Box	Creator uploads work URL + optional note
Revision Notes	Vendor feedback text if requesting changes
Payment Panel	Agreed amount display; vendor controls release / hold
Chat Panel	Inline messaging thread between vendor and creator

CREATOR SUBMISSION WORKFLOW

```
Access workspace → Download brief + assets
       |
       ▼
Complete work outside platform
       |
       ▼
POST /api/project/submit { url, note }
Status → SUBMITTED
       |
  ┌────┴────┐
Approved   Revision Requested
  |              |
  ▼              ▼
COMPLETED    Notes sent
Payment      Creator revises
RELEASED     and resubmits
```

Screens 09–12 — Supplementary Screens

SCREEN	ROUTE	KEY DETAILS
09 — Profile	`/profile/[username]`	Cover image + avatar, identity block (name, role badge, verification checkmark), bio, stats row (posts, rating, skills), skill chips, portfolio WORK grid, recent DROP list. Own profile shows Edit button; others show Message + Apply CTAs.
10 — Inbox	`/inbox`	Two-panel layout: conversation list (left) + bubble-style active chat (right). Unread count badges. Text input + send button. Project-specific chat lives within `/project/[id]`.
11 — Application Detail	`/application/[id]`	Campaign preview card, creator's proposal text, status badge (PENDING / ACCEPTED / REJECTED). Vendor-only: Accept (Hire) and Reject action buttons. Applications submitted via POST `/api/application`.
12 — Settings	`/settings`	Profile photo upload, display name edit, bio, skills/interests toggles, password change section, notification toggles, verification status display (read-only badge).

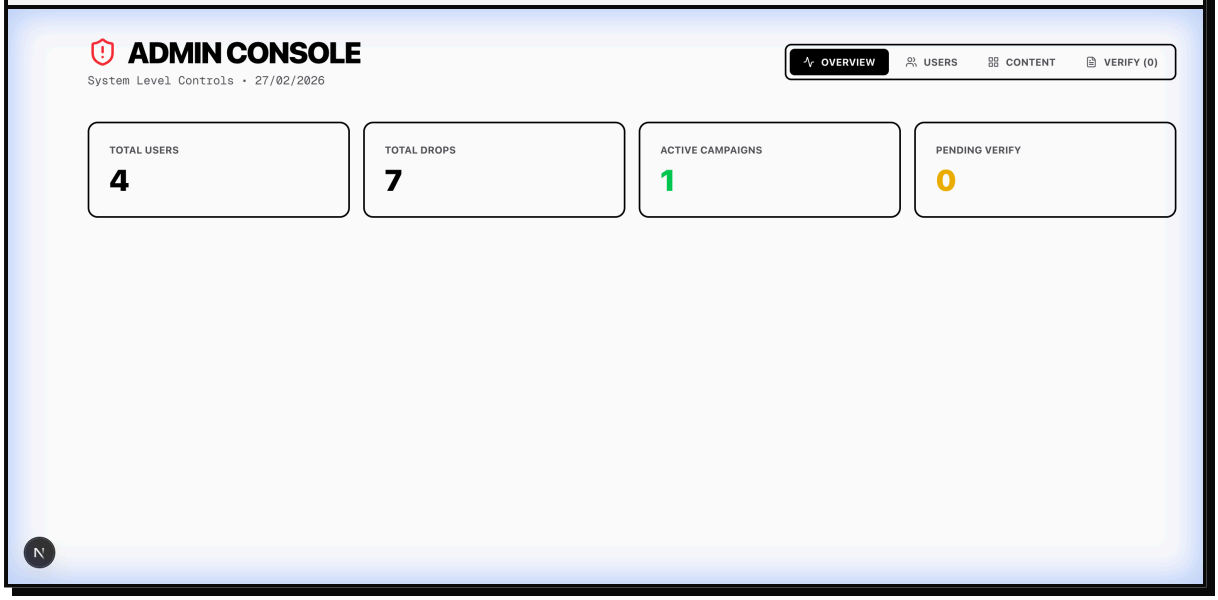
13 Admin Console

/admin · Admin Role Only

Access: Restricted exclusively to users with `role === "admin"`. Unauthorized access redirects to feed.

TAB 1 — OVERVIEW

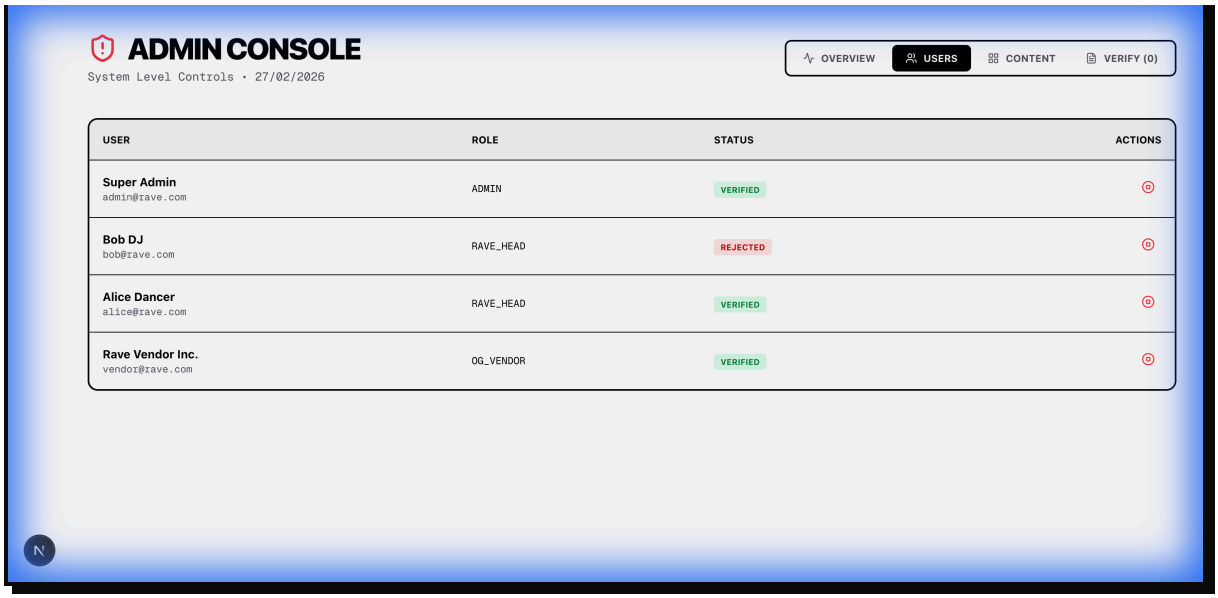
● LIVE SCREENSHOT — ADMIN OVERVIEW STATS DASHBOARD



METRIC CARD	COLOR INDICATOR
Total Users	Default (black/white)
Total Drops	Default (black/white)
Active Campaigns	Green
Pending Verifications	Yellow / Amber

TAB 2 — USER MANAGEMENT

● LIVE SCREENSHOT — USER MANAGEMENT TABLE WITH BAN ACTIONS



COLUMN	DETAILS
User	Name or Brand Name + Email address
Role	rave_head / og_vendor / admin
Status	Verification badge (verified / pending / rejected)
Actions	Ban button (red StopCircle icon) → PATCH `/api/admin/users`

TAB 3 — CONTENT MODERATION

Full table of all platform posts with: type (DROP / WORK / CAMPAIGN), author name, content snippet, engagement stats (likes, comments), and a permanent **Delete** button. Deletions are irreversible and remove content from feed and database.

TAB 4 — VERIFICATIONS QUEUE

Card grid of pending users (2-column on desktop). Each card shows: role badge, name, email, submission date, ID document link (clickable preview), and Approve/Reject action buttons.

```
Admin clicks ID document link → reviews identity
        |
        ▼
Click APPROVE or REJECT
        |
        ▼
POST /api/admin/verification { userId, status }
        |
verified → Full platform access (create, apply)
rejected → View-only access; cannot create content
```

4. Navigation Structure

The NavDock component renders as a fixed left floating pill sidebar on desktop, and a fixed bottom dock on mobile. Both share the same 5 navigation items:

ICON	LABEL	ROUTE	DESKTOP	MOBILE
🏠 Home	Feed	`/`	Left floating dock	Bottom dock
🔍 Search	Explore	`/explore`	Left floating dock	Bottom dock
➕ Plus (CTA)	Create	`/create`	Left floating dock	Bottom dock center
💬 Message	Inbox	`/inbox`	Left floating dock	Bottom dock
👤 User	Profile	`/profile`	Left floating dock	Bottom dock

5. Data Model Summary

User Model

FIELD	TYPE	NOTES
name	String	Required
email	String	Unique identifier
role	Enum	rave_head / og_vendor / admin / support
interests	String[]	Rave Head only (Creator, Editor, Musician, ...)
skills	String[]	Rave Head only (user-defined skill tags)
brandName	String	OG Vendor only
vendorType	Enum	individual / company
verificationStatus	Enum	unverified / pending / verified / rejected
idDocument	String	URL to uploaded government ID
rating	Number	Computed from completed project reviews

Post Model

FIELD	TYPE	NOTES
type	Enum	DROP / WORK / CAMPAIGN
author	ObjectId → User	
content.title	String	Optional
content.text	String	Required
content.mediaUrl	String	Image or Video URL
workDetails.tags	String[]	WORK type only
workDetails.category	String	WORK type only
campaignDetails.requirements	String[]	CAMPAIGN type only
campaignDetails.budget	String	CAMPAIGN type only
metrics.likes	Number	Default 0
metrics.comments	Number	Default 0

Campaign Model

FIELD	TYPE	NOTES
title	String	Required
vendorId	ObjectId → User	OG Vendor only
type	Enum	CREATOR / SALES / FREELANCE
requirements	String[]	List of deliverable requirements
payAmount	String	Free-form (e.g., "₹5000 per reel")
status	Enum	active / closed
assets	String[]	Brand asset URLs for download

Application Model

FIELD	TYPE	NOTES

campaign	ObjectId → Campaign	
applicant	ObjectId → User	Rave Head
status	Enum	PENDING / ACCEPTED / REJECTED
message	String	Creator's proposal text

Project Model

FIELD	TYPE	NOTES
campaign	ObjectId → Campaign	
vendor	ObjectId → User	OG Vendor
creator	ObjectId → User	Rave Head (hired)
status	Enum	ACTIVE / SUBMITTED / REVISION / COMPLETED
paymentStatus	Enum	PENDING / HELD / RELEASED
agreedAmount	Number	Negotiated payment amount
submissionUrl	String	Deliverable link from creator
submissionNote	String	Optional note from creator

6. API Endpoints Summary

METHOD	ENDPOINT	DESCRIPTION
POST	`/api/auth/signup`	Register new user (all roles)
POST	`/api/auth/login`	Login, returns signed JWT
GET	`/api/feed`	Fetch paginated feed posts
GET	`/api/dashboard`	Fetch role-based dashboard data
POST	`/api/application`	Submit application to a campaign
POST	`/api/project/init`	Hire creator → create project record
POST	`/api/project/submit`	Creator submits deliverable
GET	`/api/messages`	Fetch conversation messages for current user
POST	`/api/messages`	Send a message to another user
GET	`/api/admin/stats`	Fetch platform overview metrics
GET	`/api/admin/users`	List all registered users
PATCH	`/api/admin/users`	Execute ban on a user
GET	`/api/admin/content`	List all posts for moderation
DELETE	`/api/admin/content`	Delete a post (permanent, no undo)
GET	`/api/admin/verification`	List pending verification users
POST	`/api/admin/verification`	Approve or reject a user's identity

7. Key User Journeys

Journey 1 — New Rave Head (Creator)

```
Sign Up → Choose "Rave Head" → Fill profile + Upload Government ID
        ↓
```

```
Dashboard (pending verification banner shown)
       ↓
Admin reviews ID → Approves → verificationStatus = "verified"
       ↓
Creator can now: Post content, Apply to campaigns
       ↓
Browse feed → Find CAMPAIGN post → Click APPLY → Write proposal
       ↓
Vendor reviews application → Clicks HIRE
       ↓
Project workspace created → Creator downloads brief + brand assets
       ↓
Creator submits deliverable URL → Vendor approves → Payment RELEASED
```

Journey 2 — New OG Vendor (Brand)

```
Sign Up → Choose "OG Vendor" → Fill brand details + Upload ID
       ↓
Dashboard (pending verification)
       ↓
Admin approves → Campaign posting enabled
       ↓
Create Campaign → Published to global feed
       ↓
Rave Heads apply → Review applicant profiles in Dashboard
       ↓
HIRE creator → Project workspace created
       ↓
Review submission → Approve or request Revision → COMPLETED
```

Journey 3 — Admin Moderation Cycle

```
Login as admin → /admin
       ↓
Overview tab: Review platform health metrics
       ↓
Verifications tab: Review pending ID documents → Approve or Reject
       ↓
Users tab: Monitor user activity → Ban bad actors
       ↓
Content tab: Review reported or flagged posts → Delete violations
```

8. Verification State Machine

```
UNVERIFIED (default at account creation)
       │
       ▼  User uploads ID document during signup
PENDING (awaiting admin review)
       │
  ┌────┴──────────┐
 Admin Approves  Admin Rejects
  │                  │
  ▼                  ▼
VERIFIED           REJECTED
(full access:      (limited: view feed,
 create, apply)     cannot post or apply)
```

9. Design System

TOKEN	VALUE
Primary Font	Inter — body and headings
Monospace Font	JetBrains Mono — labels, data, code
Heading Style	Bold uppercase (font-weight: 900, letter-spacing: tight)
Button Style	"Tactile" — 8px solid black drop shadow offset (neobrutalist)
Color Palette	Black (#0A0A0A) / White (#FFFFFF) / Off-white / Muted grays
Border	2px solid black on all interactive elements and cards
Border Radius	xl (12px) for cards; full (9999px) for avatars and pill shapes
Card Shadow	`8px 8px 0px 0px rgba(0,0,0,1)`
Design Language	Neobrutalism — bold, tactile, graphic, no gradient backgrounds

10. Out of Scope — Future Phases

- Push notifications (web push + mobile)
- Payment gateway integration (Stripe or Razorpay)
- Video call / screen share within project workspace
- Public API for external brand integrations
- Subscription tiers and platform fee / revenue model

- Native mobile app (iOS and Android)
- Multi-language and internationalization support
